## Soluciones inspiradas en el hielo

Durante 70 años, Follett ha creado soluciones innovadoras en materia de hielo para promover la salud, la seguridad y el bienestar. Ofrece desde depositos de almacenamiento de hielo de dispensación por gravedad y sistemas de transporte hasta máquinas de hielo que impiden la formación de sarro Horizon Elite con hielo Chewblet, el preferido de los consumidores, producción de hielo a distancia con la tecnología RIDE y la más amplia variedad de dispensadores de hielo y agua de la industria. Follett puede mantener el hielo más limpio, ahorrar horas de trabajo extra para su personal y deleitar a los consumidores, y al mismo tiempo ofrecer costos de ciclo de vida útil más bajos.

# Elija el hielo correcto

A la gente le encanta el hielo Chewblet.  
En realidad, el doble de personas prefiere este tipo de hielo en lugar del hielo en cubos porque es gustoso y fácil de masticar.

## Disfrute del incremento en las ganancias

Un 30 % de las personas comprará más bebidas de expendedoras cuando tengan hielo Chewblet.

- Aumentarán las ventas de bebidas fountain con altos márgenes.
- El desplazamiento superior de las bebidas disminuye los costos en jarabes.

## Rendimiento superior

El hielo Chewblet tiene el mismo rendimiento que el hielo en cubos:

- se derrite a la misma velocidad,
- tiene el mismo rendimiento con placas frías.

## Más opciones de hielo

- Hielo Chewblet (aproximadamente 2,54 cm (1") de largo)
- Micro Chewblet™ (aproximadamente 0,95 cm (3/8") de largo)
- Hielo en escamas

«He estado yendo al (restaurante con servicio al auto de mi localidad) a la hora del almuerzo casi todos los días durante el último año solo por el hielo Chewblet».

«¡Me enamoré del hielo Chewblet! Es masticable, sabe delicioso y hace que mi bebida sea más divertida».

# Gran capacidad Máquinas de hielo Horizon Elite

## Diseño revolucionario

**El desafío:** el agua que contiene altos niveles de minerales disueltos, también llamados sólidos disueltos totales (TDS), genera acumulación de sarro, obstruye las tuberías de drenaje y produce hielo blando que puede atascarse en los dispensadores.

**La solución:** con Horizon Elite, el agua fresca de entrada fuerza los sólidos disueltos hacia el depósito donde se aíslan y expulsan en descargas de bajos volúmenes.

Horizon Elite utiliza importantes avances en tecnología **para reducir los costos operativos durante la vida útil de la máquina de hielo.**

Minimiza la necesidad de tratamiento del agua

Reduce la frecuencia de desincrustación de hielo

Produce un hielo que se dispensa mejor

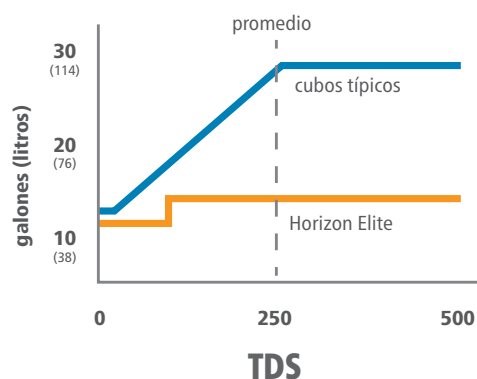

### Horizon Elite

- Elimina en gran medida la necesidad de desincrustar la máquina de hielo entre los intervalos de sanitización normales.
- Reduce drásticamente la necesidad de utilizar ósmosis inversa u otros procesos costosos de control del sarro en aguas más propensas a la formación de sarro.
- Produce hielo más puro para una dispensación sin problemas.
- Propicia una mayor vida útil del equipo con menos desgaste del engranaje reductor.
- Utiliza entre un 35 % y un 50 % menos de agua que las máquinas de hielo en cubos.
- Elimina la necesidad de revisar o sustituir cojinetes.

«Nos sorprendió que no hubiera sarro en los evaporadores ni en las barrenas después de más de un año de funcionamiento en agua con un nivel de TDS alto».

Agua usada por cada 45 kg (100 lb) de hielo

## Ubicadas a distancia

# Máquinas de hielo RIDE

RIDE (equipo para enviar hielo sobre distancia) entrega hielo automáticamente a través de un tubo de hasta 23 m (75 pies) de largo.

- Permite un acceso total al área de almacenamiento de hielo del dispensador para poder limpiar.
- Elimina el calor y el ruido en el área de las expendedoras.
- Genera un área más atractiva con la máquina de hielo fuera de la vista.
- Deja más espacio libre para publicidad.
- Facilita el acceso para realizar tareas de mantenimiento, sin ocasionar interrupciones para los clientes.

## Guidelines to Sizing Ice Systems

Every operation is different and requires special considerations in sizing equipment. For new locations, use the guidelines below. You may want to add 10-20% for growth or add for unusual types of usage, e.g., icing down drink barrels, bagging ice for resale. For a replacement unit, be sure to ask if the existing unit met the operator's needs. If not, add the amount of ice being purchased to the capacity of the existing unit to determine necessary production for the new unit.

## FLAKE

## NUGGET

Flake ice is a smart choice for everything from blended cocktails and salad bars to produce, seafood and meat displays. It is also a popular choice for therapeutic use in healthcare facilities.

Our original Nugget ice is the best choice for carbonated beverages and therapeutic use. The H<sup>2</sup> Nugget allows for better dispensing and also melts slower.
